

PROFESSIONAL SUMMARY

Full-stack developer with 3+ years of paid production experience (Eos Chimera Technologies, 2017–2020) and a measurable track record of shipping business impact. Promoted to Sub-Lead at Codebility in Feb 2026 — formalized bug reporting processes, facilitated team meetings, and conducted code reviews across multiple projects. Specialized in React, Next.js 14, TypeScript, and PostgreSQL. Key achievements: 93% efficiency improvement in attendance logging and systems managing █21,200/month revenue. Seeking remote full-time role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend: React 18, Next.js 14, Angular, Tailwind CSS, Zustand
Backend: Node.js, NestJS, Express, RESTful APIs, Vercel Serverless Functions
Database: PostgreSQL, Supabase (RLS + Auth), Prisma ORM, MongoDB
Tools: Git/GitHub, Docker, Vercel, Cursor, Claude (AI-assisted development)
Leadership: Team coordination, code review, bug triage process design, meeting facilitation

EXPERIENCE

★ Sub-Lead Developer · Codebility
↑ Promoted from #3 ranked contributor (165 pts) out of full cohort

Feb 2026 – Present | Remote, Volunteer
Stack: Next.js 14, TypeScript, Supabase, PostgreSQL

- Formalized team bug reporting process — defined severity tiers (Blocking/Major/Minor), Discord channel protocol, and Tuesday triage system adopted across all departments and projects.
- Facilitated weekly team meetings, created structured voting polls, and managed team coordination as senior developers transitioned out.
- Conducted code reviews and enforced quality standards for remaining team members.
- Maintained project continuity as the #2 and other senior contributors exited the cohort.

Contributing Developer · Codebility
Jun 2025 – Jan 2026 | Remote, Volunteer
Stack: Next.js 14, TypeScript, Supabase, Zustand, Tailwind CSS, PostgreSQL

- Ranked #3 contributor (165 pts) out of entire cohort — 2.3× output of team lead.
- Shipped Attendance Points System: fixed critical calculation bugs, recalculated all records, full QA pass.
- Built 10-Star Member Rating System — fixed auth ID mapping pattern now used team-wide.
- Delivered Gmail-style Draft Tasks (30-sec auto-save) and Deadline tracker with countdown display.
- Established Supabase RLS policy patterns and reduced component duplication by 83% via architecture consolidation.

Independent Developer · Self-Employed
Aug 2020 – Dec 2024 | Remote
Stack: React 18, Node.js, PostgreSQL, Prisma ORM, Vercel Serverless

- OGMOK Jiu-Jitsu Academy:** 93% efficiency gain in attendance logging (15 min → 30 sec). Manages █21,200/month revenue for 23 active students — SMS notifications, dashboards, full CRUD.
- Transitioned from Angular to React/Next.js ecosystem through end-to-end production builds.

Junior Web Developer · Eos Chimera Technologies
Sep 2017 – Jul 2020 | Cebu City, Philippines
Stack: Angular, NestJS, PostgreSQL, Docker, REST APIs

- 3 years paid production on enterprise e-commerce platform — 99%+ uptime, Docker deployments, 5-person team.
- Full-stack: Angular frontend → NestJS backend → PostgreSQL data layer with code reviews.

KEY PROJECTS

OGMOK — Jiu-Jitsu Academy Membership System *Production · 23 active users*
React · Node.js · PostgreSQL · Prisma · Vercel | github.com/raineer24/student-membership-tracking

- 93% efficiency gain in attendance logging (15 min → 30 sec).
- Tracks █21,200/month revenue — real business impact, real users.

Codebility Platform *Production · Enterprise-scale*
Next.js 14 · TypeScript · Supabase · Tailwind | codebility.tech

- Enterprise internship and team management platform — multi-project Kanban, real-time features, RBAC auth.
- Contributor + Sub-Lead: shipped 5+ major features, established auth and RLS patterns for the team.

EDUCATION

Bachelor of Science in Information Technology · Asian College of Technology, Cebu City | 2008–2013
